PROJECTS

Social Network Web Application | 2026

Personal Project – Full-stack Web Development

- Designed and optimized a robust relational database schema utilizing MySQL with 14 interconnected tables.
- Developed core social networking features including user posts, media file uploads, and interactive like/comment logic.
- Implemented secure user authentication (Login/Register) and seamless profile management using Laravel Framework.

Astronomy & Stargazing Web Application | 2026

Personal Project – Front-end Development

- Built an interactive and responsive web interface for astronomy enthusiasts to explore celestial bodies and stargazing events.
- Implemented dynamic UI components using modern JavaScript to showcase real-time star maps and astronomical data.
- Optimized web performance and layout structure using clean CSS/Tailwind to ensure a smooth, immersive user experience.

EDUCATION

Thu Duc College (TDC) | 2024 - Present

Associate Degree in Information Technology (Major in Web Programming)

- Specialized in Full-stack web application development and relational database management.
- Gained strong hands-on experience in building responsive user interfaces and secure backend logic through practical projects.
- Developed a solid technical foundation in specialized IT English and problem-solving through programming.

TECHNICAL SKILLS

Languages & Front-end

- HTML5, CSS3, JavaScript, Tailwind CSS

Tools & Platforms

Git, GitHub, VS Code, XAMPP

Back-end & Databases

PHP, Laravel Framework, MySQL

Core Competencies

Object-Oriented Programming (OOP),  
Software Testing
